

Strong structure, highest quality components and powerful processing are a necessity in hard working conditions. Suitable for tracked machines as well as large wheeled harvesters, PONSSE H7 HD offers heavy-duty reliability and performance for rough demands.

PONSSE

PONSSE H7 HD

MEASUREMENTS	
Weight	from 1,200 kg (2,646 lbs) excl. rotator
Length	1,500 mm (59 in)
Width	1,540 mm (61 in)
Height without rotate	nr 1 680 mm (66 in)

FEEDING UNIT	
Feed system	3 rollers
Feed power	30 kN (6,744 lbf)
Feed speed	5 m/s (16.4 ft/s)
Largest opening (feed rollers)	650 mm (25.6 in)

SAW UNIT	
Hydraulic chainsaw	
Saw bar length	750 mm (30 in)
Cutting diameter	640 mm (25.2 in)
Chain	0.404 in

^{*} Available optional saw box lights and saw chain grease lubrication.

DELIMBING UNIT		
Number of knives	4+1+1	
Maximum opening of front knives	640 mm (25.2 in)	
Maximum opening of rear knives	750 mm (30 in)	
Delimbing knives and feed rollers are separately controlled		

PONSSE H7 HD is a heavy-duty harvester head for felling and processing. It can be fitted into tracked carriers and large rubber-wheeled harvesters. It has the same well-known features that make PONSSE H7 popular around the world, but in an even more robust package. The frame is built stronger in the saw box and tilt pin area, and the tilt frame is reinforced to withstand heavy use in tracked machines. Fast and strong feeding and sawing, versatile but easy settings and compact, reliable structure ensure a long and productive lifetime for the head even in the most demanding conditions.

Excellent feeding power and fuel economy are achieved with three feed roller lay-out and easy pressure settings thru Opti control system. The lower feed rollers support the tree from underneath giving good traction while the upper roller location lowers the friction between the harvester head and the tree. Optimal tilt pivot geometry minimize the upwards torque of the head, giving smoother feeding and better grip of the tree.

PONSSE Opti control system is designed specifically for PONSSE harvester heads. All adjustments and settings work perfectly together with the head, offering easy but versatile functions to perfectly fit the base machine and work requirements. PONSSE systems offer mobile follow-up of production and working with either manual or automatic data transfer.

- Strong and reliable structure
- Fast and strong feeding
- Fast sawing
- Accurate feeding to length
- Advanced Opti system
 - Accurate measuring
 - Easy settings
 - Useful and easy-to-use reporting program
 - Possibility to use GPS positioning, wireless data transfer and different kinds of Windows-compatible software
- Good support from the manufacturer in all situations

TRACKED CARRIER	
Operating pressure	28 MPa (4,061 psi)
Carrier weight (min)	20 tons

OPTIONAL EQUIPMENT

Plenty of optional equipment is available in addition to the comprehensive PONSSE H7 HD standard equipment. Consult your nearest Ponsse Service Center or dealer for more information on the standard and optional equipment.

The manufacturer reserves the right to make technical changes and improvements.
